

Faculty Dashboard

TEAM:

- 1) Parth Mistry
- 2) Archit Ghevariya

NOTE:

*Use maximum browser functionalities for below specified requirements and reduce load of backend as much as you can, remember to write **optimized** code not **ordinary** code.*

And after finishing frontend then ask for leader to review and once final then and then only backend coding should be initiated.

▪ Functional requirements:

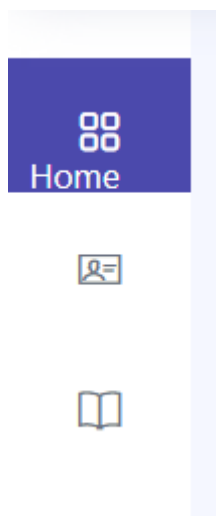

- 1) At very First Replace logo given below with latest one we have decided.

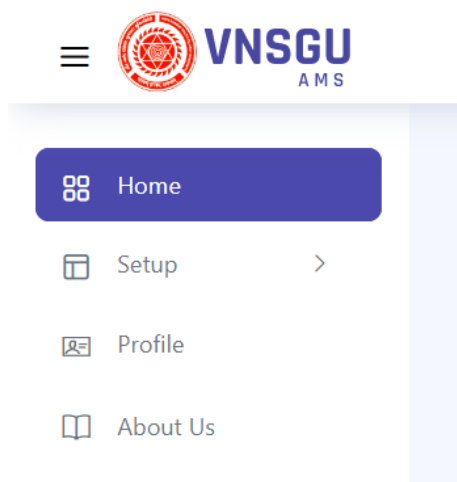

- 2) Remove Below Given Link (for now) and fix side nav bar panel issue on desktop screen.

Developers

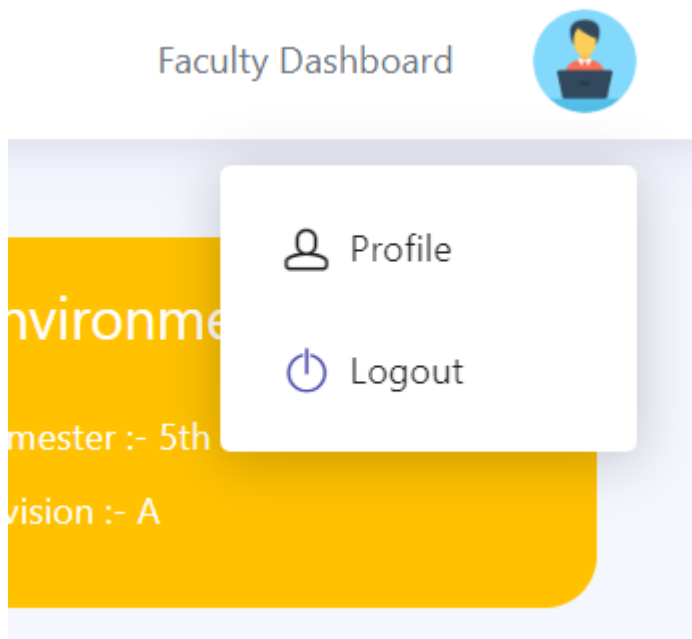

NOTE: As you can see navbar is causing many issues like above given and below provided

Try to fix this or else make navbar like below stated.

- 3) Remove profile option from here as it making redundancy of features

NOTE: instead of “faculty dashboard” we could write

Post of faculty which you can find in database faculties table, I found it very convenient instead of simple text which makes not any extra sense.

Example,

Teaching Assistant

Associate Professor

Lab Admin

4) No change in About page still ask shikha tikiwala to go through content and revise it if needed rest of all are great.

About VNSGU

Veer Narmad South Gujarat University offers different programmes through well designed curricular, co-curricular and extra-curricular activities; undertakes research and reaches out to society at large with various extension activities, in order to empower its stakeholders for the world class skills in terms of : research and enquiry, creativity and innovation, capacity to use high technology and value-based ethical leadership.

About ICT Department

The institute was started in year 2000 and comes under the Veer Narmad South Gujarat University, Surat. The Courses offered here are a mixed blend of Computer Engineering, Computer Science, Business systems, Management, Electronics and Communication Engineering, computer Application etc. The goal of M.Sc(IT)/ICT Programs is to prepare students with intellectual and professional skills with breadth and depth of knowledge, to enable them to fetch challenging career opportunities in an ever-changing world of Information and communication technology.

About JPD-AMS

This is a fully functional RFID based attendance management system. Enables the faculties to record students' attendance in a fuss-free manner. It is basically a fusion of software, hardware and web-based application. The system is directly connected to the database without any intermediary.

Extremely fast, secure and reliable system for the department to maintain the daily attendance of students without any hassle. A major benefit of the system is its automation and quick response characteristic.

Address

J.P. Dawar Institute of Information Science & Technology,

5) This below part should implemented for this dashboard and it should be dynamic according to current timing.

Here Instead of name Based on Faculty's gender Sir/Madam should be written.

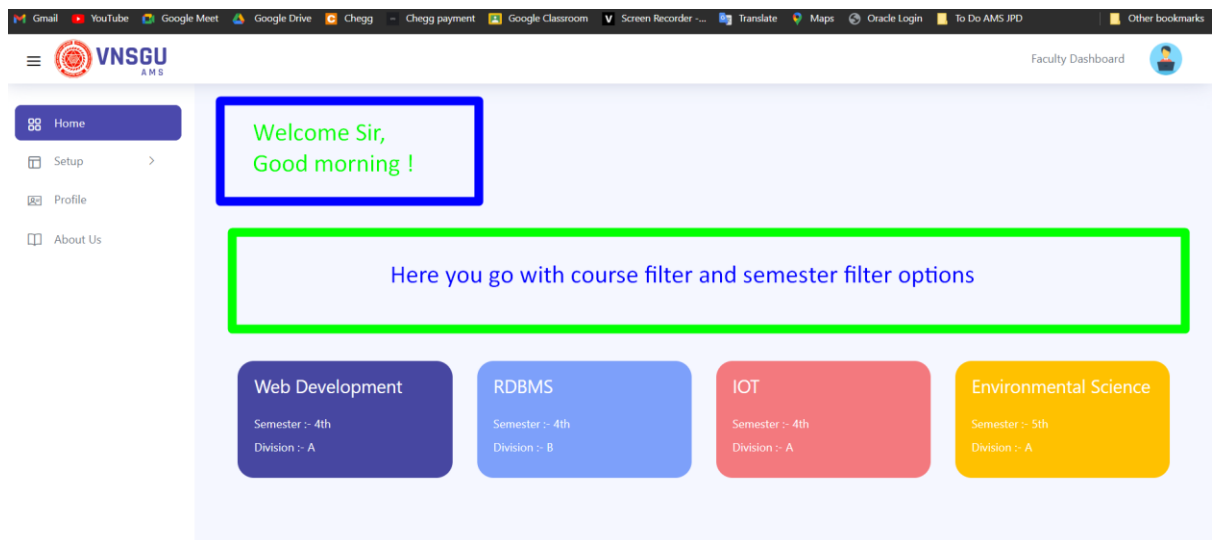

Welcome Archit,
Good Morning!

- Good Morning,
- Good Afternoon,
- Good Evening,

NOTE:

Remove exclamation mark in above phrase instead use ',' (comma)

6) Implement one small panel in between of setup and Welcome message

Here you will put control to filter courses and semester and based on selections below classrooms will be shown.

Here

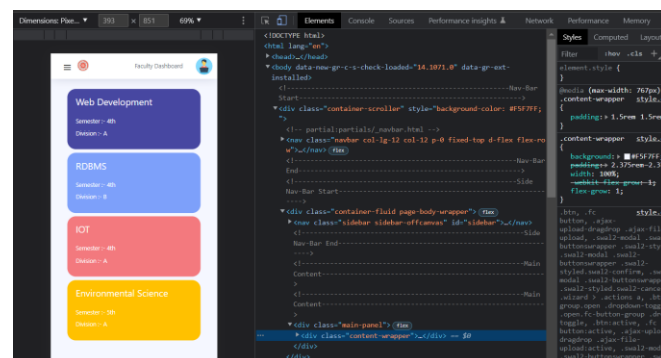

Initially on dashboard home screen all setups/classroom should be listed and in responsive design it should be listed horizontally no “see... all” should not be need

One scenario of above example:

1) Desktop screen

2) Responsive

NOTE: there is no need for “see all...” link as faculty can have maximum 10 subject in each semester which will be easily visible on all size screens and also archive option is there so unnecessary setups will be moved in another folder.

7) On upper side of dashboard home page there should be classroom list of which faculty has created.

Following details should be on each card of class in given order

- Subject **CODE**
- Course Name
 - Semester
 - Division
- Total students enrolled for class
- 3 dot button which includes(modify/delete/archive option)

Remember Archive is not separate page it is option which transfer that setup to below shown page which you will make below

Here Setup should be replaced by “Classroom”

New Setup = “New classroom”

Modify Setup = “Archived classroom”

Archive option moves setup to newly created archive section

Delete will delete setup from database and take a back up to another database

Modify option will open separate page which contains details about classroom like how many students are enrolled and add/remove student option and other details like course subject semester of classroom etc..

And in student details SPID, Full name, email, gender, delete/add option should be there

I mean those who are existing in front of them delete only like below

Student Data

Show

10

entries

Search

SPID	First Name	Middle Name	Last name	Email Address	Gender	Actions
2019008990	Ghevariya	Archit	Nareshbhai	ghevariyaarchit3@gmail.com	Male	
2019008991	Ramani	Harshil	Shaileshbhai	harshilramani9777@gmail.com	Male	
2019008992	Ghevariya	Archit	Nareshbhai	ghevariyaarchit3@gmail.com	Male	

NOTE: Here change Student data = “Enrolled students”

And those who will be added in front of their row like below

Add Student

Student SPID

Enter student SPID

Search

Instead of this just put appropriate green color icon just like below delete icon

Student Details

Select	SPID	First Name	Middle Name	Last name	Email Address	Gender
	2019008990	Ghevariya	Archit	Nareshbhai	ghevariyaarchit3@gmail.com	Male
	2019008991	Ramani	Harshil	Shaileshbhai	harshilramani9777@gmail.com	Male

2020049846	Naruto	10	5	80%

11) Develop this

Take Attendance

Clear

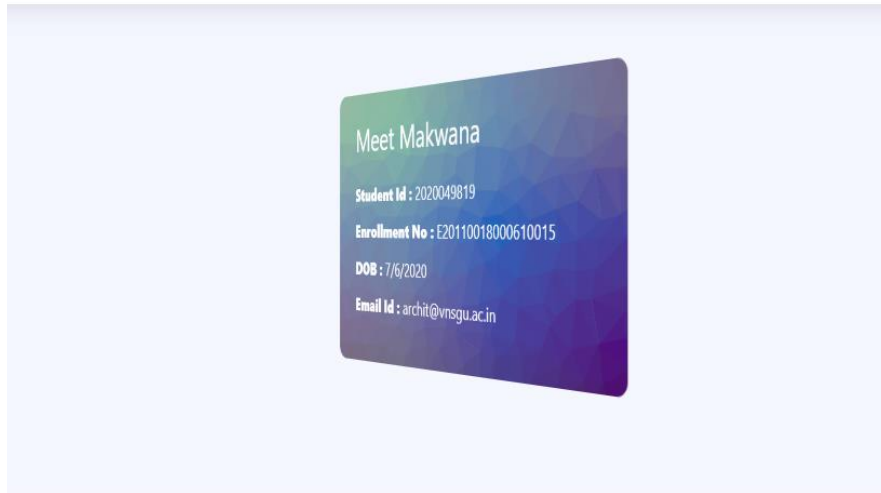

Develop one dynamic area like shown in below image in which all students of paricular classroom are default uncheckedso whenever api fetch data about attedance automatically checkbox get ticked and absent once just come up at first of the area so teacher can speak out name and verify at ease.

Sample:

Student Details						
Select	SPID	First Name	Middle Name	Last name	Email Address	Gender
☐	2019008990	Ghevariya	Archit	Nareshbhai	ghevariyaarchit3@gmail.com	Male
☐	2019008991	Ramani	Harshil	Shaileshbhai	harshilramani9777@gmail.com	Male

- Non-Functional requirements:

- 1) Event should be single click it means on single click card should be flipped to backside and on double click card should be visible into full screen and background must be black.

NOTE: Kindly change the color of the card so it can be different from students virtual cards.

2 Virtual ID Card should only contain following information at back.

- FID
- Date of birth
- Email
- Post

NOTE: No need to write name at backside

2) This below part of profile should contain only below information in given sequence with appropriate controls.(read only)

1)Personal Information

- Full Name
- Gender
- POST
- Joiing year

2)Contact Information

- Email
- Phone Number
